Autumn Term 1	Autumn Term 2	Spring term 1	Spring term 2	Summer term 1	Summer term 2
Approx: 7 weeks	Approx: 7 weeks	Approx: 6 weeks	Approx: 6 weeks	Approx: 6 weeks	Approx: 7 weeks

Autumn Term 1

Year 12 - Paper 1 – Exercise Physiology	Year 12 - Paper 2 – Sports Psychology	Year 12 - Paper 3- Contemporary issues in physical activity & sport
<p><u>Skeletal and Muscular Systems</u></p> <p>1. Joints, movements and muscles</p> <ul style="list-style-type: none"> • Shoulder: <ul style="list-style-type: none"> - Flexion, extension, abduction, adduction, horizontal flexion/ extension, medial and lateral rotation, circumduction - Deltoid, latissimus dorsi, pectoralis major, trapezius, teres minor • Elbow: <ul style="list-style-type: none"> - Flexion, extension - Biceps brachii, triceps brachii • Wrist: <ul style="list-style-type: none"> - Flexion, extension - Wrist flexors, wrist extensors • Hip: <ul style="list-style-type: none"> - Flexion, extension, abduction, adduction, medial and lateral rotation - Iliopsoas, gluteus maximus, medius and minimus, adductor longus, brevis and magnus • Knee: <ul style="list-style-type: none"> - Flexion, extension - Hamstring group: biceps femoris, semi-membranosus, semi-tendinosus - Quadriceps group: rectus femoris, vastus lateralis, vastus intermedius and vastus medialis 	<p><u>Individual Differences</u></p> <p>1. Personality</p> <ul style="list-style-type: none"> • Definition of personality • Theories of personality: <ul style="list-style-type: none"> – Trait (extroverts/introverts; stable/unstable; Type A/Type B) – Social learning – Interactionist <p>2. Attitudes</p> <ul style="list-style-type: none"> • Definition of attitude • Factors affecting attitude formation • Components of attitude: cognitive; affective; behavioural • Methods of attitude change: persuasive communication & cognitive dissonance <p>3. Motivation</p> <ul style="list-style-type: none"> • definitions of: intrinsic motivation & 	<p><u>Emergence & Evolution of sport</u></p> <p>1. Socio-cultural factors</p> <ul style="list-style-type: none"> • Definition of social • Definition of cultural <p>2. Identify the 7 socio-cultural factors:</p> <ul style="list-style-type: none"> • Social class • Gender • Time & money • Transport • Law and order • Education and literacy • Influence of public schools <p>3. Mob football in pre-industrial Britain</p> <ul style="list-style-type: none"> • Which social class?

Key Stage 5 Curriculum Map 2021-22

<ul style="list-style-type: none"> • Ankle: <ul style="list-style-type: none"> - Dorsi flexion, plantar flexion - Tibialis anterior, soleus, gastrocnemius • Planes of movement: <ul style="list-style-type: none"> - frontal - transverse - sagittal 2. Functional roles of muscles and types of contraction <ul style="list-style-type: none"> • Roles of muscles: <ul style="list-style-type: none"> - agonist - antagonist - fixator • Types of contraction: <ul style="list-style-type: none"> - isotonic - concentric - eccentric - isometric 3. Analysis of movement <ul style="list-style-type: none"> • Analyse movement with reference to: <ul style="list-style-type: none"> - joint type - movement produced - agonist and antagonist muscles involved - type of muscle contraction taking place. 4. Skeletal muscle contraction <ul style="list-style-type: none"> • Structure and role of motor units in skeletal muscle contraction • Nervous stimulation of the motor unit: <ul style="list-style-type: none"> - motor neuron - action potential 	<p style="text-align: center;">extrinsic motivation</p> <ul style="list-style-type: none"> • Uses and effects of: intrinsic motivation & extrinsic motivation <p>4. Arousal</p> <ul style="list-style-type: none"> • Definition of arousal • Effects of arousal: drive theory; inverted U theory; catastrophe theory <p>5. Anxiety</p> <ul style="list-style-type: none"> • Definition of anxiety • Types of anxiety: state and trait • Response to anxiety: somatic and cognitive; zone of optimal functioning. <p>6. Aggression</p> <ul style="list-style-type: none"> • Definition of aggression • Theories of aggression: instinct; social learning; frustration-aggression hypothesis; aggressive cue hypothesis <p>7. Social Facilitation</p> <ul style="list-style-type: none"> • Definition of social facilitation and social inhibition 	<ul style="list-style-type: none"> • Which gender? • What about rules? (law and order /education) • When played? (availability of time) • How was it played? (availability of money, law and order, education) • Where and how often was it played? (availability of time and transport) • Give real-life examples of mob football <p>4. Background of popular recreation in pre-industrial Britain</p> <ul style="list-style-type: none"> • Sport and pastimes reflected society and the life people at the time led. • Social class system influenced everything • Role of the church was important at the time • Peasants led a tough life and had very little free time • Drinking public houses were a hub for socialising and activities • Activities that existed at this time were: bear baiting, cock fighting, dog fighting, billiards,
---	---	---

Key Stage 5 Curriculum Map 2021-22

<ul style="list-style-type: none"> - neurotransmitter - 'all or none' law. <p>5. Muscle contraction during exercise of differing intensities and during recovery</p> <ul style="list-style-type: none"> • Muscle fibre types: <ul style="list-style-type: none"> - slow oxidative - fast oxidative glycolytic - fast glycolytic recruitment of different fibre types during exercise of differing intensities and during recovery. 	<ul style="list-style-type: none"> • The effect of an audience on: introverts/extroverts; beginners/experts; simple/complex skills; gross/fine skills • Evaluative apprehension • Strategies to minimise social inhibition. 	<p>bowls and skittles.</p> <ul style="list-style-type: none"> • Country pursuits such as hunting, coursing (chasing hares) and shooting were done by the upper classes. • Militaristic activities such as archery and fencing also grew at this time.
---	--	---

Autumn 2

Paper 1 – Exercise Physiology	Year 12 - Paper 2 – Sports Psychology	Year 12 - Paper 3- Contemporary issues in physical activity & sport
<p><u>Cardiovascular and Respiratory Systems</u></p> <p>1. Cardiovascular system at rest</p> <ul style="list-style-type: none"> • The relationship between, and resting values for: <ul style="list-style-type: none"> - heart rate - stroke volume - cardiac output - methods of calculating the above • Cardiac cycle: <ul style="list-style-type: none"> - diastole - systole • Conduction system of the heart linked to the 	<p><u>Group and Team Dynamics in Sport</u></p> <p>1. The formation of groups and sports teams using stages of group development:</p> <ul style="list-style-type: none"> • forming • storming • norming • performing <p>2. Steiner's model of group effectiveness</p>	<p><u>Popular recreation in pre-industrial Britain</u></p> <ul style="list-style-type: none"> • Natural/simple: lack of technology, lack of purpose-built facilities, lack of money for majority of population. • Rural: Prior to industrial revolution, Britain was mainly rural and agricultural. • Simple unwritten rules: organisation was basic, literacy was poor and results and rules were passed on by word of mouth, no NGBs had been

Key Stage 5 Curriculum Map 2021-22

<p>cardiac cycle.</p> <p>2. Cardiovascular system during exercise of differing intensities and during recovery</p> <ul style="list-style-type: none"> • Effects of different exercise intensities and recovery on: <ul style="list-style-type: none"> - heart rate - stroke volume - cardiac output - methods of calculating the above • Redistribution of cardiac output during exercise of differing intensities and during recovery: <ul style="list-style-type: none"> - vascular shunt mechanism - role of the vasomotor centre - role of arterioles - role of pre-capillary sphincters • mechanisms of venous return during exercise of differing intensities and during recovery regulation of heart rate during exercise: <ul style="list-style-type: none"> - neural factors - hormonal factors - intrinsic factors. <p>3. Respiratory system at rest</p> <ul style="list-style-type: none"> • Relationship between resting values for: <ul style="list-style-type: none"> - breathing frequency - tidal volume - minute ventilation • Methods of calculating the above mechanics of breathing at rest and the muscles involved: <ul style="list-style-type: none"> - diaphragm - external intercostals - at the alveoli 	<p>3. Ringelmann effect and social loafing.</p> <p><u>Leadership in Sport</u></p> <ol style="list-style-type: none"> 1. Characteristics of effective leaders 2. Emergent or prescribed leaders 3. Leadership styles; <ul style="list-style-type: none"> • autocratic • democratic • laissez-faire 4. Theories of leadership; <ul style="list-style-type: none"> • trait perspective • social learning • interactionist 5. Chelladurai's multi-dimensional model of sports leadership. 	<p>formed.</p> <ul style="list-style-type: none"> • Local: Limited transport and communication meant that sport had to be local. It wasn't until newspapers were created that sport became widely advertised and promoted. • Cruel/violent: reflected harshness of society at time. • Occasional: generally took part as part of holy days, village fairs or Christmas celebrations. • Courtly: affected by the two class system. • Occupational: work often became the basis for sport. E.g. competitive rowing came out of Thames ferryman racing • Wagering: was an obsession. For wealthy, betting was a display of financial and social status. <p><u>Post-1850 Industrial Britain</u></p> <ol style="list-style-type: none"> 1. Social class <ul style="list-style-type: none"> • Upper/lower vs. upper/middle/working • Professionalism & amateurs 2. Time & transport
---	---	---

Key Stage 5 Curriculum Map 2021-22

<ul style="list-style-type: none"> - at the muscles. 4. Respiratory system during exercise of differing intensities and during recovery <ul style="list-style-type: none"> • Effects of differing intensities of exercise and recovery on: <ul style="list-style-type: none"> - breathing frequency - tidal volume - minute ventilation • Mechanics of breathing during exercise of differing intensities and during recovery, including additional muscles involved: <ul style="list-style-type: none"> - inspiration – sternocleidomastoid, pectoralis minor - expiration – internal intercostals, rectus abdominis. • Regulation of breathing during exercise of different intensities and during recovery <ul style="list-style-type: none"> - neural control - chemical control • Effect of differing intensities of exercise and recovery on gas exchange at the alveoli and at the muscles <ul style="list-style-type: none"> - changes in pressure gradient - changes in dissociation of oxyhaemoglobin. 		<ul style="list-style-type: none"> • Changes • Railways 3. Sport in post-1850 industrial Britain was increasingly: <ul style="list-style-type: none"> • Urban • Regular • Regional • With written rules • More controlled/sophisticated/respectable • Less wagering 4. Gender: changing status of women. 5. Availability of money 6. Law and order 7. Education and literacy

Key Stage 5 Curriculum Map 2021-22

Spring 1

Paper 1 – Exercise Physiology	Year 12 - Paper 2 – Skill Acquisition	Year 12 - Paper 3- Contemporary issues in physical activity & sport
<p><u>Energy for Exercise</u></p> <ol style="list-style-type: none"> 1. Adenosine Triphosphate (ATP) and energy transfer <ul style="list-style-type: none"> • ATP as ‘energy currency’ • Principle of energetically coupled reactions: <ul style="list-style-type: none"> - breakdown of ATP to ADP (Adenosine Diphosphate) + P (phosphate) - resynthesis of ATP from ADP + P. 2. Energy systems and ATP resynthesis <ul style="list-style-type: none"> • Energy systems: <ul style="list-style-type: none"> - ATP-PC (Phosphocreatine) system - glycolytic system - aerobic system • For each system: <ul style="list-style-type: none"> - type of reaction (aerobic or anaerobic) - chemical or food fuel used - specific site of the reaction - controlling enzyme - ATP yield - specific stages within the system - by-products 3. ATP resynthesis during exercise of differing 	<p><u>Classification of skills</u></p> <ul style="list-style-type: none"> • Justification of placement of skills on continua: <ul style="list-style-type: none"> - difficulty (simple/complex) - environmental influence (open/closed) - pacing (self-paced/externally paced) - muscular involvement (gross/fine) - continuity (discrete/serial/continuous) - organisation (low/high). <p><u>Types and methods of practice</u></p> <ol style="list-style-type: none"> 1. Characteristics and uses of each: <ul style="list-style-type: none"> - part practice - whole practice - whole/part-whole practice - progressive/part practice - massed practice - distributed practice - fixed practice - varied practice 2. Transfer of skills <ul style="list-style-type: none"> • Types of transfer: <ul style="list-style-type: none"> - positive - negative - proactive 	<p><u>Influence of public schools:</u></p> <ul style="list-style-type: none"> • The promotion and organisation of sports and games. • The promotion of ethics through sports and games. • The cult of athleticism. • The spread and export of games and the game ethic. • Thomas Arnold <p><u>20th Century Sport</u></p> <ol style="list-style-type: none"> 1. Many developments took place during the 20th century in the UK: <ul style="list-style-type: none"> • There was a massive development of scientific and technological innovation. • Many societies became hugely rich, but wealth was still unequally shared. • There was considerable growth of cities (urbanisation).

Key Stage 5 Curriculum Map 2021-22

<p>intensities and durations</p> <ul style="list-style-type: none"> • The energy continuum • Predominant energy system used during exercise: <ul style="list-style-type: none"> - how intensity and duration of exercise influence which energy system is predominantly used to resynthesise ATP - interpretation of figures relating to the contribution of the three energy systems to exercise of different intensities and durations • Interplay of energy systems during intermittent exercise and factors that affect this interplay <ul style="list-style-type: none"> - intensity of exercise - duration of exercise - recovery periods - fitness levels. <p>4. The recovery process</p> <p>How the body returns to its pre-exercise state:</p> <ul style="list-style-type: none"> - Excess Post-exercise Oxygen Consumption (EPOC) <ul style="list-style-type: none"> • Fast components of EPOC, the processes that occur and the duration: <ul style="list-style-type: none"> - replenishment of blood and muscle oxygen stores - re-synthesis of ATP and PC • Slow components of EPOC, the processes that occur and the duration: <ul style="list-style-type: none"> - elevated circulation - elevated ventilation 	<ul style="list-style-type: none"> - retroactive - bilateral • Know and understand the ways of optimising the effect of positive transfer • Know and understand the ways of limiting the effect of negative transfer. <p>2. Principles and theories of learning movement skills</p> <ul style="list-style-type: none"> • Theories of learning: <ul style="list-style-type: none"> - operant conditioning - cognitive theory of learning - Bandura's theory of social/observational learning. 	<ul style="list-style-type: none"> • Communications technology made great advances. This allowed ideas to spread rapidly and sports and pastimes to become more globalised. • There was more time for leisure, less time spent on work, and therefore more participated in sport. • Stress due to wars and terrorism, the undermining of traditional values and the rapid pace of life took a great toll on people's general health and well-being. <p>2. Changes in socio-cultural factors</p> <p>3. Growth in spectatorship and money in sport</p> <p>4. Growth in professionalism</p> <p>5. Sport during the war</p> <p><u>21st Century Sport</u></p> <p>1. Characteristics:</p> <ul style="list-style-type: none"> • High performance sport now a global product • Highly structured • It is 'big business' involving huge investment
--	---	---

Key Stage 5 Curriculum Map 2021-22

<ul style="list-style-type: none"> - elevated body temperature - lactate removal and conversion to glycogen • Effect of exercise intensity on EPOC and implications of the recovery process for planning exercise or training sessions. <p><u>Environmental Effects on Body Systems</u></p> <p>1. Exercise at altitude</p> <ul style="list-style-type: none"> • Effect of altitude on the cardiovascular and respiratory systems: <ul style="list-style-type: none"> - reduced arterial PO₂ (partial pressure of oxygen) leading to impaired muscle O₂ delivery - elevated heart rate and ventilation • Acclimatisation, including the importance of timing arrival, at altitude (above 2400m). <p>2. Exercise in the heat</p> <ul style="list-style-type: none"> • Effect of heat on the cardiovascular and respiratory systems: <ul style="list-style-type: none"> - temperature regulation - cardiovascular drift. 		<ul style="list-style-type: none"> • Driven by media • Higher standards & expectations • Great impact of modern technology • Globalisation & commercialisation • Tighter links between sport & law • Elements of deviance & drugs <p>2. Social class & social mobility</p> <p>3. Social class in 21st Century</p> <p>4. Gender</p> <p>5. Other socio-cultural factors</p> <p>6. Globalisation of sport:</p> <ul style="list-style-type: none"> • Definition of globalisation • Freedom of movement and greater exposure of people to sport • Possible reasons for the globalisation of sports people. <p>7. Media Coverage</p> <ul style="list-style-type: none"> • Types of media
--	--	---
